

Harsha Vardhan Jalli

GENAI ENGINEER · 12+ YEARS · FRONT-END LEAD

GenAI engineer with 12+ years of front-end depth, currently shipping production AI systems for healthcare workflows at **Evernorth / Cigna**. Hands-on across the modern LLM stack — RAG, multi-agent orchestration, evaluation pipelines — with the front-end craft to actually surface those systems as products, plus the leadership range to align stakeholders, mentor engineers, and drive delivery through ambiguity. Previous work for **S&P Global, Hitachi, Hexagon, JPMorgan, and CME**.

CORE SKILLS

GENAI	Python · Prompt Engineering · RAG · LangChain · LangGraph · LangSmith · LlamaIndex · CrewAI · AutoGen · Ragas · Vector DBs (Pinecone, Chroma, FAISS) · Embeddings & Re-ranking · Streamlit · Gradio · LLMOps · NLP · Containerization
FRONT-END	React (7y) · Next.js · TypeScript · JavaScript (12y) · Redux · RxJS · Tailwind · SCSS · Micro-Frontends · Monorepos · Module Federation · Design Systems · D3 · Highcharts · TradingView · AG Grid
BACKEND	Node.js · Express · FastAPI · Java · REST · WebSockets · MongoDB · SQL · Microsoft Azure · Power BI · Elastic Search
LEADERSHIP	Technical Leadership · Stakeholder Management · Cross-Functional Collaboration · Delivery Ownership · Mentoring · Sprint Planning · Requirements Discovery · Client Communication
TOOLING	Git · GitHub · GitHub Copilot · VS Code · Cursor · Webpack · Jira · Postman · SonarQube · Figma · LangSmith · Vercel · Agile / Scrum delivery

EXPERIENCE

Evernorth Health Services — Software Engineering Advisor

JAN 2025 – PRESENT

Hyderabad · Parent: Cigna Healthcare · Domain: Healthcare GenAI

Architecting and shipping production **generative AI systems** embedded inside healthcare workflows where accuracy, traceability, and PHI-handling are compliance requirements.

Building **RAG pipelines** with deliberate chunking and re-ranking, plus multi-agent orchestration via **LangGraph** and **CrewAI**.

Instrumenting LLM behavior through **LangSmith** and **Ragas** evaluation suites — keeping model output measurable rather than anecdotal.

Owning the **surface area**: streaming responses, tool-use UI, conversational design tuned for clinical pace, while aligning product, engineering, and domain stakeholders on safe rollout.

LTIMindtree — Senior Specialist, Software Engineering

JAN 2021 — JAN 2025

Hyderabad · Client: S&P Global · Platts Dimensions Pro · Team of 8

Designed and shipped **"Ask AI"** — an OpenAI-powered conversational layer over Platts commodities data, the team's first production GenAI feature; owned prompt design, grounding, streaming UI.

UI lead from scratch on a flagship **13-commodity intelligence portal** across web and mobile — Figma → React/Next.js → integration with distributed product and backend teams, with day-to-day coordination across an 8-person squad.

Set architecture direction in **micro-frontend** patterns with TypeScript, Redux, RxJS, AntDesign, and helped guide delivery decisions across the team.

Seneca Global — UI Analyst, Front-End Lead

DEC 2019 — DEC 2020

Hyderabad · Client: Hitachi Vantara · Manufacturing Insights · Team of 10

Front-end lead on Hitachi's **IoT manufacturing-analytics platform**; solo-built a mobile-first QR-scanning companion that walked operators through every step of a machine's process in real time.

Owned requirements with the Hitachi product team and delegated across the 10-person crew — an early leadership role spanning estimation, task breakdown, and stakeholder communication.

Built REST APIs in Node.js + Express alongside the React UI.

EXPERIENCE CONTINUED

Hexagon Capability Center India — Senior Software Engineer

Hyderabad · Product: HxGN OnCall Analytics · Team of 7

MAR 2017 — DEC 2019

Built **OnCall Analytics** from zero — Hexagon's incident-management suite for police, fire, EMS dispatch — deployed to **Microsoft Azure** with embedded **Power BI**.

Worked across the stack: React UI, Node/Express APIs, MongoDB, Elastic Search, while partnering closely with product and engineering peers to move a net-new product into delivery.

Polaris Financial Technologies — Consultant (Full-Stack & UI)

Hyderabad & JPMC Onsite · Clients: JPMorgan Chase · Chicago Mercantile Exchange

OCT 2013 — MAR 2017

Sole engineer chosen to work **onsite at the JPMC client location** for a 9-application **IE8 → IE11** framework migration.

Lone UI engineer on the **EDB → OSCAR migration** for CME — modernizing a legacy VB.net trading-data system.

Earlier: built JPMC's **Client Facing Program** and **SQM release dashboard** integrating ALM and JIRA.

HireFlow

An AI-powered hiring workflow — automating candidate screening and pipeline orchestration with LLMs.

Coffee RAG

A focused RAG demo over a coffee-domain corpus — chunking, embeddings, retrieval, and a chat surface.

MCP-local-tool

Local Model Context Protocol tool — experimenting with the emerging MCP standard for safe LLM tool use.
